

Enduro T47 Bottom Brackets offer a solution for Threaded 47mm bottom bracket shells and most crankset standards. T47 Bottom Brackets are 100% USA made, from Aircraft-Grade Aluminum. T47 bottom brackets thread directly into the BB shell, like a typical BSA bottom bracket. This system is effective in eliminating Bottom Bracket Noise.

T47 Bottom Brackets are available in two bearing options, XD-15 Ceramic and Angular Contact Stainless Steel. T47 is also offered in Campagnolo Ultra-Torque cups for T47 bottom bracket shells.
