

We offer a wide variety of bearing kits for most hub manufacturers. If you have the following bearings you'll be able to service hubs from the following manufacturers as well as many others.

This catalog is a comprehensive list of wheel system bearing kits to replace all the bearings in both front, rear and freehubs. Some wheel or hub manufacturers require special tools to service the bearings. For example DT Swiss hubs require specific removal and pilots, our BBT-013 tool covers all aspects of the DT design. Consult the manufacturer for additional technical information regarding replacement of bearings.

At Enduro we also offer bearing kits to service pedals from major pedal manufacturers.
