

We offer a wide variety of bearing suspension kits for most bicycle manufacturers. If you have the following bearings you'll be able to service suspension pivots from the following bicycle manufacturers as well as many others.

This catalog is a comprehensive list of bearing kits to replace all the bearings in frame and rear triangle pivots. Some bicycles require special tools to service the bearings. Often times you will need a Blind Puller to remove bearings from the frame that cannot be pressed out from the other side. Always use the correct tools to remove and install the bearings into the frame.
