

Enduro TorqTite Bottom Brackets offer a solution for most bottom bracket press-fit shells and crankset standards. TorqTite Bottom Brackets are 100% USA made, from Aircraft-Grade Aluminum. The TorqTite system features two cups that thread onto a center-sleeve. This system is effective in eliminating Bottom Bracket Noise.

TorqTite Bottom Brackets are available in two bearing options, XD-15 Ceramic and Angular Contact Stainless Steel.
